Media Advisory – Cushing Earthquakes

As a result of an analysis of disposal well and seismicity data in the Cushing area, the Oklahoma Corporation Commission's Oil and Gas Conservation Division (OGCD) is implementing a plan to change the operation of certain disposal wells in the Cushing area. ** The plan may be altered as more data is made available.

The plan calls for 2 disposal wells to stop operations, and for 3 others to reduce disposal volume.

The wells and operators are:

Operator: American Energy-Woodford, LLC

**Wells: Calyx 35-2: reduce volume
Louis 6-3: shut in, plug back
Wilson 11-15: shut in
Clay: - reduce volume**

Operator: F.H.A Investments

Wells: FHA 1-15: reduce volume
