## **Media Advisory**

*New actions taken in response to earthquake activity in Crescent area*

**The three oil and gas wastewater disposal wells closest to the earthquake activity in the Crescent area are changing their operations. After being contacted by the Commission's Oil and Gas Division, operators of two of the wells are shutting down operations, while the third well farthest from the activity will reduce its injected volume by 50 percent.**

**Operators of the wells took the actions voluntarily. No directives were necessary.**

**-OCC-**
